

AI-ASSISTED FEEDBACK MODEL

The human accountability
workflow:

✓ **STEP 1: AI generates
initial feedback**

Use AI to draft comments
on student work

Fast, consistent,
covers key points

✓ **STEP 2: Teacher reviews
and personalises**

Add context AI doesn't know:

- Student's prior progress
- Learning needs (SEND, EAL)
- Confidence/motivational needs
- Classroom discussions/
explanations
- Next steps based on your planning

✓ **Teacher approves and sends**

You are accountable for the final feedback
Check tone, accuracy, appropriateness

AI gives you the scaffold, you add the humanity.

**AI provides structure.
You provide expertise.**
