

WHY HUMAN OVERSIGHT MATTERS:

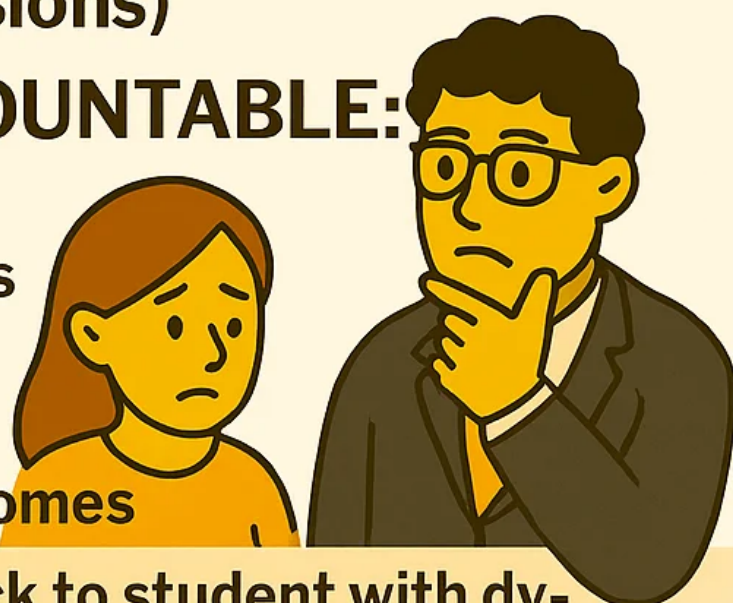

AI doesn't know:

- ✗ Your curriculum specifics
- ✗ Your students (SEN, prior learning, context)
- ✗ Your school (policies, resources)
- ✗ Last week's lesson

AI is human-designed (with biases, priorities, exclusions)

YOU ARE ACCOUNTABLE:

- ✓ Accuracy
- ✓ Appropriateness
- ✓ Safeguarding
- ✓ Bias detection
- ✓ Educational outcomes

Example: AI feedback to student with dyslexia who just gained confidence.

AI gives harsh criticism. It doesn't know context: Damage = your responsibility.
