

QUALITY ASSURANCE FRAMEWORK

Every AI output needs systematic checking:

1 CURRICULUM ALIGNMENT

Check against: NC/exam spec, assessment objectives

Question: Does this match what I'm required to teach?

2 FACTUAL ACCURACY

Check against: Subject knowledge, reputable sources

Question: Is this information correct? Any hallucinations?

3 AGE APPROPRIATENESS

Check: Reading age, conceptual difficulty, examples

Question: Can my students access this?

4 BIAS & REPRESENTATION

Check: Gender, race, disability, culture, assumptions

Question: Who's included? Who's invisible?

5 DIFFERENTIATION QUALITY

Check: Genuine scaffolding vs more/less work

Question: Does this meet different learning needs?
